Examiner's Amendments to the Specification

Please replace the paragraph beginning on line 2, page 1, with the following paragraph:

This application is a continuation of application U.S.S.N. 09/417,988 filed October 13, 1999, now U.S. Patent No. 6,248,229 issued June 19, 2001, which is continuation of application U.S.S.N. 09/096,504, filed June 12, 1998, now U.S. Patent No. 6,013,170, issued November 1, 2000, which is continuation of application U.S.S.N. 08/873,977 filed June 12, 1997, now U.S. Patent No. 6,013,459, issued November 1, 2000.

The following is an **Examiner's Statement of Reasons for Allowance**:

Claims 33-48 are directed to compositions comprising an array of electrodes, each electrode comprising a covalently attached binding ligand and a covalently attached solvent accessible transition metal complex comprising a metal selected from

the group consisting of manganese, technetium, rhenium, iron, ruthenium. Osmium, cobalt, rhodium, iridium, nickel, palladium, platinum, copper, silver and gold.

Electrodes comprising a covalently attached binding ligand and a covalently attached solvent accessible transition metal complex are free of prior art. Further, the prior art does not teach or suggest preparing such specifically claimed electrodes. Hence said electrodes are also non-obvious.

Since claimed electrodes are both novel and non-obvious, compositions comprising an array of such electrodes as specifically claimed are also novel and non-obvious.

Claims 33-48 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
